Our Success Begins With Our People

Our dedicated and knowledgeable employees are known for their truck & bus and heavy-duty industry expertise in the development, diagnosis, and engineering of communications networks both in and for your engine-driven equipment. They can be found leading industry task forces at SAE, TMC, and ISO, as well as training others, often including competitors, in the basics and very latest developments in communications technologies. Allow us to help you with your next communications project!

Our Customers

Our customer base is very diverse, as we work with production managers from vehicle and component manufacturers, as well as their design engineers and technicians. Our end users can be found worldwide, from Truck & Bus and Heavy Duty vehicle OEMs and their suppliers, to Automotive OEMs and suppliers, as well as the extreme requirements of military vehicles and applications.

Heavy-Duty Industries Served

DG Technologies' products and services are used in a broad range of Heavy-Duty industries, including Truck & Bus, Agriculture, Construction, Mass Transit, and Mining. Additionally, Industrial Automation, Industrial Stationary Equipment, and Control Process industries use our products and services in support of their Heavy-Duty networking requirements.

Over 20 Years of Expertise in Products & Services for In-Vehicle Communications

For nearly a quarter of a century, we have been one of the foremost experts in the field of in-vehicle and controller area networks. With our world class product line, consulting, and education & training programs, we are recognized as the industry leader by most OEMs and their suppliers. In network protocols, including both their development and use, we are the experts in the field.

Whether you are planning for the future, documenting compliance to a requirement, regulation, or standard, solving an existing design challenge, or engineering a new solution:

DG Technology is your partner for success!
