

- 1) Download VBIODemo.zip, Unzip VBIO Demo, Folder on your PC.
- 2) Download and run the Gryphon® C/C++ Libraries, Release 4.2 Win32 Installer.
- 3) Open the "VBDemo1.vbp" visual Basic project with VB.

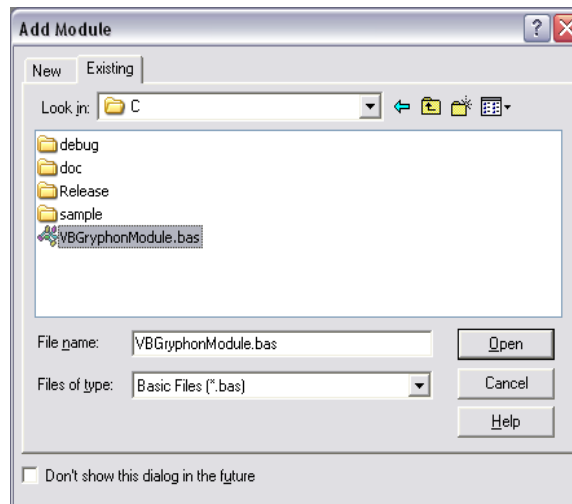

A file not found error will occur for VBGryphonModule.bas module. Answer yes to continue. The Module file was not found by the IDE during the opening of the Project. To resolve this perform the following:

In the Project Window; Select the Modules folder right click and select Add Module

In the Add Module for navigate to the

C:\ProgramFiles\DG_Gryphon_Lib_4_2\Gryphon\Libs\Client\C directory.

Select the VBGryphonModule.bas file. And add that to the project.

The IO Demo App. will now compile and execute properly.
