Instructions:

- 1 Install drivers from the CD.
The latest Drivers can always be found at <http://www.dgtech.com>
- 2 After rebooting, you will be prompted to check for updates. Connect to the Internet and press "Continue". Then press the "Check for Updates" button. If there are updates (red), press the "Download" button. DG Update will download and start the installation.
- 3 Using the USB cable, connect the Netbridge to your PC. Connect the vehicle-side cable to the Netbridge.
- 4 Make certain to first connect the vehicle-side cable to the Netbridge as stated in 3 above.
Now, connect the other end of the vehicle-side cable to the device or network (including power and ground).
- 5 Configure your application to use the Netbridge.
