## Instructions:

- 1 Install J2534 compliant drivers from the CD. The latest drivers, downloads, and documents can always be found at <http://www.dgtech.com>
- 2 After rebooting, you are prompted to check for updates. Connect to the Internet and press "Continue", then "Check for Updates". If there are updates (red), press the "Download" button.
- 3 Connect the USB cable from the d-briDGe Pro to the PC. Then, connect the vehicle cable to the d-briDGe.
- 4 Connect the vehicle cable to the vehicle or equipment's diagnostic port.
- 5 Configure your application to use the d-briDGe Pro. The "d-briDGe Pro User Manual" (Start->All Programs->Dearborn Group Products->d-briDGe Pro-> Documentation ->d-briDGe Pro User Manual)
