

# DG Diagnostics (OBDII)

A diagnostic triage software with light duty through heavy duty functionality to support service bay repairs across multiple vehicle platforms including off-highway, agricultural and industrial-stationary equipment.

## Differentiation

**Software suite compatible with all DG's J2534 products**

- **No annual update fees**

## Automotive OBDII Key Features

- Supports all OBDII J1979 modes & parameters
- Display Diagnostic Trouble Codes (DTCs) and DTC Freeze Frame Data
  - Active, pending and permanent
- Allows clearing of DTCs and emissions-related monitor information
- Monitor all ECM-supported OBDII parameters
- Display vehicle information (VIN, CALID's etc.)
- Display OBD monitors supported and their status
- Display test results of OBD monitors
- Produce a user friendly HTML vehicle health & status report

## Automotive OBDII Benefits

- Reduces the need for expensive scan tools
- Provides diagnostics for automotive vehicles
- Compatible with vehicles & equipment using any OBDII protocol
