

Secure Your Vehicle Against Cyber Attackers

Inspect the following areas of a commercial vehicle for any of the following.

Tractor General

- Altered interior lighting
- Anything unusual in factory-built compartments
- Unexplained new or shiny bolts and/or screws
- Unusual scratches possibly made by screwdrivers, wrenches or similar clandestine entry tools
- Signs of tampering, such as broken parts or bent sheet metal

Exterior

- Lights not working
- Compartments in frame rails (frame rails are normally open)
- Cold or nonfunctioning exhaust pipe during operation
- Battery box containing tampered-with batteries or disconnected battery wires
- Storage compartments that contain unusual items
- Magnetic GPS tracking devices attached on or under the tractor or trailer

Fuel and Air Tanks

- Inconsistent/missing connections

Engine Compartment

- Odd wires
- Cold spots on radiator
- Foreign object or false compartment in the air filter area
- Additional wires from battery compartment
- Unusually clean components and devices

Under Vehicle

- Items taped or attached to frame
- Magnetic tracking device to track load
- Signs of recent installation of components
(ask driver about repairs)
