## Transportation/Fleet Cybersecurity

**Cybersecurity for the Transportation Industry is complex**

- Serving trucking, diagnostics, logistics, ordering, office back-end and more!
- Brings together networked sub-systems
- Sub-system security improves end-to-end transaction integrity
- Vehicle Diagnostics sub-system needs security!

## Securing Vehicle Diagnostics

**Vehicle Diagnostics Adapters (VDAs) used daily to keep your "Fleet on the Street"**

## DG's DPA XL: Secures your Vehicle Diagnostics sub-system!

- Protects your operating system & VDA firmware
- Verifies OEM software to reflash truck ECUs
- Reduces virus/ransomware injection into your fleet's sub-systems
